

TU DARMSTADT

- One of the leading technical universities in Germany
- Relevant science for global transformations
- Cosmopolitanism and international orientation in study, teaching and research
- Cutting-edge research in three research fields:
 - Energy and Environment
 - Information and Intelligence
 - Matter and Materials
- Offers early career researchers ideal conditions for successful integration into the academic and higher education system in all qualification phases

DOCTORATE

Talented, motivated young academics find an outstanding research environment with attractive working conditions and career prospects that will help them to reach their full scientific potential.

We are looking for

University students with outstanding academic performance and suitable academic progress – demonstrated qualification in the respective subject or research topic and an interest in academic work are equally relevant for admission

You can apply

- For supervision of your PhD: via email at a professor of your choice
- For PhD positions: job advertisements on TU career website

POSTDOC

Talented, motivated young academics find an outstanding research environment with attractive working conditions and career prospects that will help them to reach their full scientific potential.

We are looking for

Researchers who have completed their doctorate with an outstanding result and who have demonstrated their suitability for in-depth academic work in their doctoral thesis, further achievements and proof of competence

You can apply

- For supervision of your postdoc: via email at a professor of your choice
- For postdoc positions: job advertisements on TU career website

CAREER BRIDGING GRANT

The Career Bridging Grant closes financial gaps between two career steps (PhD-Postdoc). It offers a **short-term** grant to allow for the application for **external individual funding** at TU Darmstadt.
